You know you have limited time to prepare for it, Now, our 300-730 learning materials can make you feel the actual test environment in advance, More and more people are concerned about this new trend and want to study IT technology.

As for the point, I can tell you that Stegschool Cisco 300-730 study guide is your unique choice, All your dreams will be fully realized after you have obtained the 300-730 certificate.

Thirdly, the PDF version of Implementing Secure Solutions with Virtual Private Networks best questions materials is easy to carry and do less harm to your eyes, With our 300-730 practice test software, you can simply assess yourself by going through the 300-730 practice tests.

NEW QUESTION: 1
Your network contains an Active Directory domain named contoso.com. The domain contains a file server named Server1 that runs Windows Server 2012 R2.
You view the effective policy settings of Server1 as shown in the exhibit. (Click the Exhibit button.)

On Server1, you have a folder named C:\Share1 that is shared as Share1. Share1 contains confidential data. A group named Group1 has full control of the content in Share1.
You need to ensure that an entry is added to the event log whenever a member of Group1 deletes a file in Share1.
What should you configure?
A. the Audit File System setting of Servers GPO
B. the Sharing settings of C:\Share1

C. the Security settings of C:\Share1
D. the Audit File Share setting of Servers GPO
Answer: C
Explanation:
You can use Computer Management to track all connections to shared resources on a Windows Server 2008 R2 system. Whenever a user or computer connects to a shared resource, Windows Server 2008 R2 lists a connection in the Sessions node. File access, modification and deletion can only be tracked, if the object access auditing is enabled you can see the entries in event log.
To view connections to shared resources, type net session at a command prompt or follow these steps:
--
In Computer Management, connect to the computer on which you created the shared resource. In the console tree, expand System Tools, expand Shared Folders, and then select Sessions. You can now view connections to shares for users and computers.
To enable folder permission auditing, you can follow the below steps:
Click start and run "secpol. msc" without quotes.
Open the Local Policies\Audit Policy
Enable the Audit object access for "Success" and "Failure".
Go to target files and folders, right click the folder and select properties.
Go to Security Page and click Advanced.

Click Auditing and Edit.
Click add, type everyone in the Select User, Computer, or Group.
Choose Apply onto: This folder, subfolders and files.
Tick on the box "Change permissions"
Click OK.

After you enable security auditing on the folders, you should be able to see the folder permission changes in the server's Security event log. Task Category is File System. http: //social. technet. microsoft. com/Forums/en-US/winservergen/thread/13779c78-0c734477-8014-f2e b10f3f10f/ http: //technet. microsoft. com/en-us/library/cc753927(v=ws. 10). aspx http: //social. technet. microsoft. com/Forums/en-US/winservergen/thread/13779c78-0c734477-8014-f2e b10f3f10f/ http: //support. microsoft. com/kb/300549 http: //www. windowsitpro. com/article/permissions/auditing-folder-permission-changes http: //www. windowsitpro. com/article/permissions/auditing-permission-changes-on-afolder

NEW QUESTION: 2

A. Option D
B. Option B
C. Option C
D. Option A
Answer: A,D

NEW QUESTION: 3
Which command displays information about isolated VLANs without associated interfaces?
A. show vlan summary
B. show vlan brief

Answer: C

NEW QUESTION: 4
Scenario
Brownlow Communications Is an enterprise that has been expanding rapidly by acquiring a number of smaller agencies. As a result of these acquisitions, the company has several data centers, which are managed separately Both the data center and campus networks are out-of-date and preventing the company from achieving Its goals. The company is looking for a network refresh that will:
Make it easier and faster to deploy new applications In tne virtualized data centers
Help the company to Innovate and Implement new business initiatives now and in the future, without constant major upgrades
Ensure that services are always available for employees and customers; critical data center applications, in particular, should experience minimal downtime
Support security initiatives and regulatory compliance
Improve performance for. and decrease user complaints about, the company's Microsoft Lync solution and other multimedia applications
Enable users to connect their own devices to the network without burdening IT staff or introducing security issues
Make it simpler for the company to expand to new branches and to handle new acquisitions
Refer to the scenario tab.
You are proposing an HP campus networking solution for Brownlow Communications How does this solution help Brownlow meet its goals for Bring Your Own Device (BYOD)?
A. HP offers different management solutions for wired and wireless networks, which helps to establish better isolation and security.

B. An HP BYOD solution replaces automated processes with manual ones so that IT staff can monitor the processes more closely.
C. HP campus networking solutions ensure that network administrators manually perform all set up on all user devices.
D. An HP BYOD solution makes it easy for IT to implement identity-based control and monitoring.
Answer: A
Explanation:
