NEW QUESTION: 1

- A. Option A
- B. Option B
- C. Option C
- D. Option D
- E. Option E

Answer: A,B

Explanation:

A: Below we see a case where we set the row archival visibility parameter to "all"

thereby allowing us to see all of the rows that have been logically deleted:

```
alter session set row archival visibility = all;
```

We can then turn-on row invisibility back on by changing row

```
archival visibility = "active":
alter session set row archival visibility = all;
B: To use ora_archive_state as an alternative to deleting rows,
you need the following settings and parameters:
1.Create the table with the row archival clause
create table mytab (col1 number, col2 char(200)) row archival;
2.Now that the table is marked as row archival, you have two
methods for removing rows, a permanent solution with the
standard delete DML, plus the new syntax where you set
ora_archive_state to a non-zero value:
update mytab set ora_archive_state=2 where col2='FRED';
3.To make "invisible rows" visible again, you simply set the
rows ora_archive_state to zero:
update mytab set ora_archive_state=0 where col2='FRED';
Note:
* Starting in Oracle 12c, Oracle provides a new feature that
allow you to "logically delete" a row in a table without
physically removing the row. This effectively makes deleted
rows "invisible" to all SQL and DML, but they can be revealed
at any time, providing a sort of "instant" rollback method.
To use ora_archive_state as an alternative to deleting rows.
