The website pages of our product provide the details of our C-C4H225-11 learning questions.

NEW QUESTION: 1

Which of the following is a benefit of using a cloud-based SaaS solution for customer engagement? (Select two.)

A. It allows for easy integration with other SaaS applications.

B. It provides a single point of contact for customers.

C. It reduces the need for customer support staff.

D. It increases the cost of customer support.

E. It provides a consistent customer experience across all touchpoints.

Answer: A, B

Explanation: A cloud-based SaaS solution for customer engagement provides a single point of contact for customers, which allows for easy integration with other SaaS applications. This also provides a consistent customer experience across all touchpoints.

Which of the following is a benefit of using a cloud-based SaaS solution for customer engagement? (Select two.)

A. It allows for easy integration with other SaaS applications.

B. It provides a single point of contact for customers.

C. It reduces the need for customer support staff.

D. It increases the cost of customer support.

E. It provides a consistent customer experience across all touchpoints.

Answer: D

Explanation:

Explanation

The below diagram from an AWS blog shows how access is given to other accounts for the services in your own account

Options A and B are invalid because you should not user IAM users or IAM Access keys Options D is invalid because you need to create a role for cross account access For more information on Allowing access to external accounts, please visit the below URL:

|<https://aws.amazon.com/blogs/apn/how-to-best-architect-your-aws-marketplace-saas-subscription-across-multip> The correct answer is: Create an IAM role for cross-account access allows the SaaS provider's account to assume the role and assign it a policy that allows only the actions required by the SaaS application.
