Answer: D
Explanation:
Explanation
A route with the 0.0.0.0/0 address prefix instructs Azure how
to route traffic destined for an IP address that is not within
the address prefix of any other route in a subnet's route
table. When a subnet is created, Azure creates a default route
to the 0.0.0.0/0 address prefix, with the Internet next hop
type. We need to create a custom route in Azure to use a
virtual network gateway in the Seattle office as the next hop.
