First, 100% hit rate.

NEW QUESTION: 1

A second router was installed on a network to be used as a backup for the primary router that works as a gateway. The infrastructure team does not want to change the IP address of the gateway on the devices. Which of the following network

components should be used in this scenario?

- A. Reserved IP
- B. Loopback IP
- C. Public
- D. Virtual IP

Answer: D

NEW QUESTION: 2

Which of the following can be applied directly to an organizational unit In Active Directory to provide security to both the user and the machine?

- A. Folder Redirection
- B. Home Folder
- C. Group Policy
- D. Security Groups

Answer: C

Explanation:

GPO's (Group Policy Objects) containing security rules can be applied to OU's (Organizational Units) containing User and Computer objects (accounts). Not C - Within Active Directory you can only use 'security group' membership to allow or disallow members of a group from applying a GPO (dictating whether they must conform or not conform to the rules defined in the policy) - does not provide security directly to the user and machine.

<https://www.serverbrain.org/network-security-2003/group-policy-inheritance-with-security-groups.html>

NEW QUESTION: 3

A Developer is working on an application that tracks hundreds of millions of product reviews in an Amazon DynamoDB table. The records include the data elements shown in the table:

Which field, when used as the partition key, would result in the MOST consistent performance using DynamoDB?

- A. starRating
- B. productID
- C. comment
- D. reviewID

Answer: D
