NEW QUESTION: 1

A packet capture log indicates that several router solicitation messages were sent from a local host on the IPv6 segment. What is the expected acknowledgment and its usage?

A. All local host traffic will be redirected to the router with the lowest ICMPv6 signature, which is statically defined by the

network administrator.

B. Duplicate Address Detection will determine if any other local host is using the same IPv6 address for communication with the IPv6 routers on the segment.

C. Router acknowledgment messages will be forwarded upstream, where the DHCP server will allocate addresses to the local host.

D. Routers on the IPv6 segment will respond with an advertisement that provides an external path from the local subnet, as well as certain data, such as prefix discovery.

Answer: D

Explanation:

Explanation/Reference:

Section: (none)

NEW QUESTION: 2

An IT auditor is reviewing the data classification for a sensitive system. The company has classified the data stored in the sensitive system according to the following matrix:
