- E. It is applied only on the egress interface
- F. It is applied only on the ingress interface

Answer: C,E

NEW QUESTION: 2

You have a Power BI model that has the following tables:

* Product (Product_id, Product_Name)
* Sales (Order_id, Order_Date, Product_id, Salesperson_id, Sales_Amount)
* Salesperson (Salesperson_id, Salesperson_name, address)

You plan to create the following measure.

Measure1 = DISTINCTCOUNT(Sales[ProductID])

You need to create the following relationships:

* Sales to Product
* Sales to Salesperson

The solution must ensure that you can use Measure1 to display the count of products sold by each salesperson.

How should you configure the relationships? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 3

A company utilizes a patching server to regularly update their PC's. After the latest round of patching all of the older PCs with non-gigabit Ethernet cards become disconnected from the network and now require a technician to fix the issue locally at each PC. Which of the following should be done to prevent this issue in the future?

- A. Disable automatic driver updates to PCs on the patching server
- B. Enable automatic rebooting of the PCs after patching is completed
- C. Require the patching server to update the oldest PCs off hours
- D. Throttle the connection speed of the patching server to match older PCs

Answer: D

NEW QUESTION: 4

Microsoft Azure API Management is a cloud-based API gateway service that protects, manages, and monitors APIs through the use of APIs that are hosted in Azure. It is a fully managed service that allows you to create, publish, and manage APIs in the cloud. It provides a central location for all your APIs, and it allows you to control access to your APIs. It also provides a variety of features that help you manage your APIs, such as authentication, authorization, and rate limiting.

Management, and it allows you to control access to your APIs. It also provides a variety of features that help you manage your APIs, such as authentication, authorization, and rate limiting.

- A. ...
- B. ...

Answer: B

Explanation:

Use a custom outbound Azure API Management policy.

Scenario:

If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor.

(API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.)
