Answer: B

NEW QUESTION: 2

You have lost all your database control files. To recover them, you are going to use the results of the alter database backup controlfile to trace command. Your datafiles and your online redo logs are all intact.

Which of the following is true regarding your recovery?

- A.** You will use the resetlogs version of the create controlfile command.
- B.** You will use the trace file to create a backup control file, and then you will recover the database with the recover database using backup controlfile command
- C.** You will need to open the database with the resetlogs command.
- D.** All you need to do is execute the trace file from SQL*Plus and it will perform the recovery for you.
- E.** You will use the noresetlogs version of the create controlfile command.

Answer: E

Explanation:

Explanation/Reference:

Explanation:

CREATE CONTROLFILE Using NORESETLOGS Example
The following CREATE CONTROLFILE statement is generated by an ALTER DATABASE BACKUP CONTROLFILE TO TRACE statement for a database with Oracle managed data files and redo log files:
CREATE CONTROLFILE

NEW QUESTION: 3

Richard is now 14.5 years older than Arthur and half of that amount older than Sam. If in 2.75 years, Richard will be twice and a half older than Arthur, then in 7 years what would be Arthur's age approximately?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Translate piece by piece into numbers. R (Richard) = A (Arthur) + 14.5.

The second equation: $R = S$ (Sam) + 7.25.

The third equation: $R + 2.75 = 2.5(A + 2.75)$. We have three equations with three variables.

Today Arthur's age is approximately 6.9 (take 7). In 7 years he would be about 14 years old.
