The high quality of XK1-005 exam training is tested and you can be assured of choice, We know each vendor has its own particular style.

NEW QUESTION: 1

You want to flash back a test database by five hours.

You issue this command:

```
SQL > FLASHBACK DATABASE TO TIMESTAMP (SYSDATE - 5/24);
```

Which two statements are true about this flashback scenario?

- A.** The database must use block change tracking for the flashback to succeed.
- B.** The database must be MOUNTED for the flashback to succeed.
- C.** The database must be opened with the RESETLOGS option after the flashback is complete.
- D.** The database must be opened in read-only mode to check if the database has been flashed back to the correct SCN.
- E.** The database must be opened in restricted mode for the flashback to succeed.
- F.** The database must have multiplexed redo logs for the flashback to succeed.

Answer: B,E

Explanation:

B: The target database must be mounted with a current control file, that is, the control file cannot be a backup or have been re-created.

D: You must OPEN RESETLOGS after running FLASHBACK DATABASE. If datafiles are not flashed back because they are offline, then the RESETLOGS may fail with an error.

Note:

*RMAN uses flashback logs to undo changes to a point before the target time or SCN, and then uses archived redo logs to recover the database forward to make it consistent. RMAN automatically restores from backup any archived logs that are needed.

*SCN: System Change Number

*FLASHBACK DATABASE to One Hour Ago: Example

The following command flashes the database by 1/24 of a day, or one hour:

```
RMAN> FLASHBACK DATABASE TO TIMESTAMP (SYSDATE-1/24);
```

NEW QUESTION: 2

An organization needs to implement more stringent controls over administrator/root credentials and service accounts

Requirements for the project include:

Check-in/checkout of credentials

* The ability to use but not know the password

* Automated password changes

* Logging of access to credentials

Which of the following solutions would meet the requirements?

A. GAAuth 2.0

B. A privileged access management system

C. A password vault system

D. Secure Enclave

E. An OpenID Connect authentication system

Answer: D

NEW QUESTION: 3

You administer Microsoft Exchange Online for Fabrikam, Inc. Fabrikam's Exchange Online tenant domain name is fabrikam.onmicrosoft.com.

You verify the domain fabrikam.com in the Office 365 admin center and instruct other administrators to configure new Exchange Online users with fabrikam.com as the primary SMTP domain. The fabrikam.com domain is not federated.

A user reports that his reply-to address is displayed to external email message recipients as [\[email#160;protected\]](#)

You need to configure the user's mailbox to meet the following requirements:

-The user's reply-to address must be [\[email#160;protected\]](#)

-The email address [\[email#160;protected\]](#) must function as a

secondary email address for the user.

Which Windows PowerShell command should you run?

- A. Set-Mailbox -Identity [email#160;protected] -EmailAddresses SIP:[email#160;protected]
- B. Set-Mailbox -Identity [email#160;protected] -SecondaryAddress [email#160;protected]
- C. Set Mailbox -Identity [email#160;protected] -EmailAddresses [email#160;protected],[email#160;protected]
- D. Set-Mailbox -Identity [email#160;protected] -EmailAddresses SMTP:[email#160;protected],[email#160;protected]

Answer: D
