with syllabus of this exam.

These products are best available on the world of internet and **050-17-RSAIGLPRO01 Examcollection Dumps Torrent** these products will facilitate you greatly in your study for the RSA Other Certification Implementation updated video lectures.

Because all questions in the actual test are included in Stegschool Valid 050-17-RSAIGLPRO01 Study Guide practice test dumps which provide you with the adequate explanation that let you understand these questions well.

NEW QUESTION: 1

- A. Hyper-V
- B. Device Health Attestation
- C. Network Controller
- D. Host Guardian Service

Answer: D

Explanation:

Explanation

<https://blogs.technet.microsoft.com/datacentersecurity/2016/06/06/step-by-step-creating-shielded-vms-withoutvm> Shielding an existing VMLet's start with the simpler approach. This requires you to have a running VM on a host which is not the guarded host. This is important to distinguish, because you are simulating the scenario where a tenant wants to take an existing, unprotected VM and shield it before moving it to a guarded host. For clarity, the host machine which is not the guarded host will be referred as the tenant host below. A shielded VM can only run on a trusted guarded host. The trust is established by the adding the Host Guardian Service server role (retrieved from the HGSServer) to the Key Protector which is used to shield the VM. That way, the shielded VM can only be started after the guarded host successfully attests against the HGSServer. In this example, the running VM is named SVM. This VM must be generation 2 and have a supported OS installed with remote desktop enabled. You should verify the VM can be connected through RDP first, as it will almost certainly be the primary way to access the VM once it is shielded (unless you have installed other remoting capabilities).

NEW QUESTION: 2

- A. Option A
- B. Option D
- C. Option E
- D. Option C
- E. Option B

Answer: B,D

NEW QUESTION: 3

Your company's appraisal policy requires that the content of the performance document be added in a collaborative manner.

Implementation requirements include:

-Both the worker and the manager are required to rate the worker.

-Conduct a review meeting for the worker, which the worker must acknowledge.

-Both the manager and the worker should be able to give their comments on the entire evaluation

process. -Workers and managers should start setting goals for the next period.

To meet these requirements, what are the correct tasks and their sequence to be designed in the process flow?

A. Set goals, manager evaluation of worker, share performance document, confirm review meeting held, provide final feedback

B. Set goals, first approval, manager evaluation of worker, worker self-evaluation, provide final feedback, second approval, set next period goals

C. Set next period goals, set goals, first approval, worker self-evaluation, manager evaluation of worker, confirm review meeting held, provide final feedback

D. Set goals, worker self-evaluation, manager evaluation of worker, share performance document, first approval, confirm review meeting held, provide final feedback

E. Set goals, worker self-evaluation, manager evaluation of worker, confirm review meeting held, provide final feedback, set next period goals

F. Set goals, worker self-evaluation, manager evaluation of worker, provide final feedback, confirm review meeting held, set next period goals

Answer: D
