**NEW QUESTION: 1**

A System API is designed to retrieve data from a backend system that has scalability challenges. What API policy can best safeguard the backend system?

- A. SLA-based rate limiting
- B. Auth 2 token enforcement
- C. Client ID enforcement
- D. IPwhitelist

**Answer: B**

**NEW QUESTION: 2**

nstructions

Why has the Branch3 router lost connectivity with R1?

Use only show commands to troubleshoot because usage of the debug command is restricted on the Branch3 and R1 routers.

- A. The PPP chap hostname and PPP chap password commands are missing on the Branch3 router.
- B. A PPP chap hostname mismatch is noticed between Branch3 and R1.
- C. A PPP chap password mismatch is noticed between Branch3 and

R1.

D. PPP encapsulation is not configured on Branch3.

**Answer: B**

Explanation:

First we should check Branch3 (and R1) with the "show ip interface brief" command to find any Layer1/Layer 2 issue.

We see the interfaces connecting between them are in "up/down" states which indicates an Layer 2 issue so we should check the configuration of these interfaces carefully with the "show running-config" command and pay attention to these interfaces.

and on Branch3:

We learn from above config is R1 is using CHAP to authenticate Branch3 router (via the "ppp authentication chap" command on R1). Branch3 router is sending CHAP hostname "Branch\_3" and CHAP password "Branch3\_Secret!" to R1 to be authenticated. Therefore we should check if R1 has already been configured with such username and password or not with the "show running-config" command on R1:

On R1 we see the configured username is "Branch3", not "Branch\_3" so the usernames here are mismatched and this is the problem -&gt; Answer A is correct.

**NEW QUESTION: 3**

Bubba has a short margin account with a short market value of \$22,000, a credit balance of \$42,000, and SMA of \$500.

What is the equity in Bubba's account?

- A. \$37,000
- B. \$500
- C. \$20,000
- D. \$20,500

**Answer: C**

Explanation:

Explanation/Reference:

Explanation: \$20,000. The equity in a short margin account is equal to the credit balance minus the short market value. SMA is not considered when computing equity.
