You have Microsoft SQL Server on a Microsoft Azure virtual machine that has a database named DB1.

You discover that DB1 experiences WRITE_LOG waits that are longer than 50 ms.

You need to reduce the WRITE_LOG wait time.

Solution: Add additional data files to DB1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

In SQL Server, if we have a transactional based system and find a high WRITELOG wait type this is a performance bottleneck and can cause the transaction log file to grow rapidly and frequently.

It is being recommended to SQL server users that they must archive the log files on a separate disk for getting better performance.
