NEW QUESTION: 1

Which of the following statements regarding preemption in static LACP mode are true? (Multiple Choice)

- A.** When a high-priority interface switches to the Inactive interface due to a fault and then Is restored, if preemption is enabled, the restored high-priority interface becomes the active interface after a delay. If preemption is disabled, the interface cannot become the active interface.
- B.** Preemption in static LACP mode is enabled by default.
- C.** If the preemption delays at both ends are different, the larger preemption delay is used.
- D.** To prevent unstable transmission due to frequent link status changes, can set a preemption delay.

Answer: B,D

NEW QUESTION: 2

You have an Exchange Server 2016 organization. The organization contains several servers.

Users in the marketing department often send Information Rights Management (IRM)-protected email messages. The IRM-protected messages are excluded from eDiscovery searches.

You need to configure the Exchange Server Organization to ensure that the contents of the mailboxes of the marketing department users are searched for all messages that contain the word ProjectX. The solution must prevent the email messages from being deleted permanently.

Your user account is a member of the required role group.

Which three actions should you perform? Each correct answer presents part of the solution.

A. Export the results from the discovery mailbox to a personal folders (PST) file, and then use Microsoft Outlook to open the PST file.

B. Run the Search-Mailbox cmdlet

C. Run the New-Mailbox cmdlet

D. Run the Set-IRMConfiguration cmdlet

E. Run the New-MailboxSearch cmdlet

F. Use Outlook on the web to open the discovery mailbox.

Answer: A, D, E
