ten minutes for 72401X exam materials, so that you can start
your learning immediately, Our 72401X guide torrent: Avaya
Meetings Server Support Certified Exam expect to help you get
the exam certification with scientific method.

NEW QUESTION: 1

In a GLBP network, who is responsible for the ARP request?

- A. AVF
- B. Standby Router
- C. Active Router
- D. AVG

Answer: D

Explanation:

Members of a GLBP group elect one gateway to be the active virtual gateway (AVG) for that group. Other group members provide backup for the AVG in the event that the AVG becomes unavailable. The AVG assigns a virtual MAC address to each member of the

GLBP group. Each gateway assumes responsibility for forwarding packets sent to the virtual MAC address assigned to it by the AVG. These gateways are known as active virtual forwarders (AVFs) for their virtual MAC address.

The AVG is responsible for answering Address Resolution Protocol (ARP) requests for the virtual IP address. Load sharing is achieved by the AVG replying to the ARP requests with different virtual MAC addresses.
