The learners may come from many social positions and their abilities to master our C-SAC-2102 study materials are varied.

NEW QUESTION: 1

What is a true statement in regards to creating custom report types?

- A.** Once a report type is saved with a standard or custom primary object, the primary object cannot be changed for that report type.
- B.** The detail object in a master- detail relationship cannot be added as a secondary object on a custom report type
- C.** Any object can be chosen unless the object is not visible to the person creating the report type through security settings
- D.** When the primary object is a custom object and is deleted,

then the report type and any reports created from it must be deleted manually.

Answer: A

Explanation:

Explanation

You can choose from all objects—even those you don't have permission to view. This lets you build report types for a variety of users. Once you save a report type, you can't change the primary object. If the primary object on a report type is a custom object, and the custom object is deleted, then the report type and any reports created from it are automatically deleted. If you remove an object from a report type, all references to that object and its associated objects are automatically removed from reports and dashboards based on that type.
