**Answer:**

Explanation:

Explanation

**NEW QUESTION: 3**

Which three settings can be controlled by using the chage breemar command as the root user, to modify the parameters in the /etc/shadow file?

A. The minimum number of days that must elapse between password changes by the user breemar

B. The maximum number of failed login attempts on the breemar account before the account is locked

C. The number of days after the breemar account is locked, that it becomes expired

D. The expiration date of the breemar account

E. The number of days after the breemar account is locked, that it becomes unlocked

F. The maximum number of days that must elapse between password changes by the user breemar before the password becomes invalid

**Answer: A,D,F**

Explanation:

Explanation/Reference:

Explanation:

A: chage -E, --expiredate EXPIRE\_DATE

Set the date or number of days since January 1, 1970 on which the

user's account will no longer be accessible.

CE: You need to use chage command to setup password aging.

The chage command changes the number of days between password changes

and the date of the last password change. This information is used by

the system to determine when a user must change his/her password.
