Choose our SAP Certification C\_HANATEC\_17 exam is the wise choice in your life, Download the free demo before purchasing, Also, our C\_HANATEC\_17 exam guide will keep advancing.

#### **NEW QUESTION: 1**

John creates a document with some text boxes. John writes in the text box but he could not see the text because the text box is not increased in size. Which of the following options will he use to accomplish the task? Each correct answer represents a part of the solution. Choose two.

- A. Word Wrap text in AutoShape.
- B. Resize AutoShape to fit text.
- C. In line with text.
- D. In front of text.

**Answer: A,B**

Explanation:

Both these options have to be selected in order to perform the

task given in the question. Answer options B and C are incorrect. These are the text wrapping options.

**NEW QUESTION: 2**

Nurse David receives baby Gil and is informed that the parents have to go home to care for their other children. What is the best gift she can give them for bonding?

- A. His pacifier.
- B. His baby bottle.
- C. His blanket.
- D. His picture.

**Answer: D**

Explanation:

The best gift Nurse David can give the parents is a picture of baby Gil to develop bonding between them. A picture is a constant reminder of their newborn child and is shown to increase bonding and caring for parents and their new born.

**NEW QUESTION: 3**

A network engineer is experiencing issues enabling LAG on the WLC. Which four characteristics should be validated to ensure LAG configuration? (Choose four.)

- A. All ports participate in the LAG by default when LAG is enabled on the controller, y
- B. Multiple LAGs are permitted on the controller.
- C. Only one functional physical port is needed to continue to pass traffic.
- D. Multiple untagged interfaces to the same port are not allowed.
- E. Primary and secondary ports are needed for each interface.
- F. The WLC does not need to be rebooted to enable the LAG configuration.
- G. Dynamic interfaces and management are moved to port 1
- H. EtherChannel must be configured for mode "on" on the switch.

**Answer: A,C,D,H**

**NEW QUESTION: 4**

Which four characteristics should be validated to ensure LAG configuration? (Choose four.)

- A. sys.dm\_exec\_session\_wait\_stats
- B. sys.dm\_exec\_query\_stats
- C. sys.dm\_exec\_sessions
- D. sys.dm\_exec\_requests

## D. Microsoft SQL Management

Studio

**Answer: A**

Explanation:

Explanation

sys.dm\_exec\_session\_wait\_stats returns information about all the waits encountered by threads that executed for each session. You can use this view to diagnose performance issues with the SQL Server session and also with specific queries and batches.

Note: SQL Server wait stats are, at their highest conceptual level, grouped into two broad categories: signal waits and resource waits. A signal wait is accumulated by processes running on SQL Server which are waiting for a CPU to become available (so called because the process has "signaled" that it is ready for processing). A resource wait is accumulated by processes running on SQL Server which are waiting for a specific resource to become available, such as waiting for the release of a lock on a specific record.
