The contents in our free demo are part of the EX318 real materials in our study engine, Without unintelligible content within our EX318 study tool, all questions of the exam are based on their professional experience in this industry.

We set up good relationship with this corporation's staff and have the best information resources, According to the statistics shown in the feedback chart, the general pass rate for latest EX318 test prep is 98%.

With this kind of version, you can flip through the pages at liberty to quickly finish the check-up of EX318 exam study material materials.

NEW QUESTION: 1

Your network contains two servers named Server1 and Server2 that run Windows Server 2012 R2. Both servers have the Hyper-V server role installed. Server1 and Server2 are located in different offices. The offices connect to each other by using a high-latency WAN link.

Server2 hosts a virtual machine named VM1.

You need to ensure that you can start VM1 on Server1 if Server2 fails. The solution must minimize hardware costs.

What should you do?

- A. On Server2, install the Multipath I/O (MPIO) feature. Modify the storage location of the VHDs for VM1.
- B. On Server1, install the Multipath I/O (MPIO) feature. Modify the storage location of the VHDs for VM1.
- C. From the Hyper-V Settings of Server1, modify the Replication Configuration settings. Enable replication for VM1.
- D. From the Hyper-V Settings of Server2, modify the Replication Configuration settings. Enable replication for VM1.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

You first have to enable replication on the Replica server--Server1--by going to the server and modifying the "Replication Configuration" settings under Hyper-V settings. You then go to VM1--which resides on Server2-- and run the "Enable Replication" wizard on VM1.

NEW QUESTION: 2

Refer to the exhibit.

Today was the first day on a new project for an offsite temporary worker at the XYZ Corporation. The worker was told to launch the SSL VPN session and then use the smart tunnel application to start a remote desktop application on the project server, projects_server.xyz.com. The worker looked at the portal screen that was provided, but she did not know how to access the smart tunnel application.

As the help desk person, what should you instruct the temporary worker to do?

- A. On the Home page, click the Address drop-down menu, choose RDP://, and fill in the destination host name, which is projects_server.abc.com.
- B. Click the Applications Access button.
- C. Click the Browse Networks button.
- D. Click the Web Applications button.

Answer: B

NEW QUESTION: 3

Which of the following is a way to implement a technical control to mitigate data loss in case of a mobile device theft?

- A. Solid state drive
- B. Mobile device policy
- C. Encryption policy
- D. Disk encryption

Answer: D

Explanation:

Disk and device encryption encrypts the data on the device. This feature ensures that the data on the device cannot be accessed in a useable form should the device be stolen.

Incorrect Answers:

- B. An encryption policy provides guidelines that limit the use of encryption to algorithms that have been proven to work effectively. The policy still needs to be applied and enforced.
- C. Solid state drives are hard drives that have memory chips to store data rather than magnetic disks. These are much faster than traditional hard disks but have no effect on data loss due to device theft.
- D. A mobile device policy provides guidelines the acceptable use of mobile devices within an organization, and means of securing the devices and the data on those devices. However, the policy still needs to be applied and enforced.

NEW QUESTION: 4

A company has an opportunity to invest in a positive net present value project, but the project would require debt finance that would push the company's gearing over a limit imposed by a debt covenant on an existing loan.

Which THREE of the following actions could be taken by the company?

- A. The company could approach its existing Lenders to negotiate a relaxation of the conditions imposed by the covenant.
- B. The project could be foregone if it cannot be funded without breaching the covenant
- C. The project could proceed if the cash inflows from the project will enable some of the debt to be repaid before the end of the financial year and so the breach of covenant may never be detected
- D. The company could seek alternative sources of funding, such as a reduction in the annual dividend payment, to finance the project.
- E. The directors could proceed with the project because their primary duty is maximise shareholder wealth, even if that conflicts with lenders' interest.
- F. The directors could meet with key shareholder to discuss whether they wish the project proceed despite the breach of the covenant

Answer: A,B,D
