NEW QUESTION: 1

- A. Option B
- B. Option A
- C. Option D
- D. Option C

Answer: B

NEW QUESTION: 2

An administrator is using Symantec Backup Exec to back up to an LTO tape device using default settings. Backups are running slower than expected.

Which option may improve backup performance?

- A. Enable optimized duplication
- B. Use deduplication
- C. Change device concurrency settings
- D. Look for updates for the device and the controller

Answer: D

NEW QUESTION: 3

Refer to the exhibit.

Which three statements about this configuration are true? (Choose three.)

- A. 192.168.1.1 is reachable using any of the addresses on the router where the static route is configured.
- B. The static route is added to the global routing table and leaked from the VRF red.
- C. The subnet 192.168.1.0 is unique to the global routing table.
- D. The subnet 192.168.1.0 is unique to the VRF red routing table.
- E. The default route appears in the global routing table.
- F. The static route appears in the VRF red routing table.

Answer: C, E, F

Explanation:

This is an example of the route leaking feature. Here, this static route is created for the red VRF so it will be installed into the red VRF routing table, but the use of the global keyword will cause this default route to appear in the global routing table.

NEW QUESTION: 4

Refer to the exhibit. Which two statements are true? (Choose two.)

- A. The static route is installed in the global routing table.
- B. The static route is installed in the VRF red routing table.
- C. The static route is installed in the VRF red routing table and leaked to the global routing table.
- D. The static route is installed in the VRF red routing table and not leaked to the global routing table.

Answer: D
