NEW QUESTION: 2

You need to recommend a solution that resolves the missing data issue. The solution must minimize the amount of development effort.

What should you recommend?

- A. Denormalize the OrderDetails table.
- B. Denormalize the Products table.
- C. Normalize the OrderDetails table.
- D. Normalize the Products table.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

* Scenario

/Missing Data Issues

Customers report that when they make a price change in the Products table, they cannot retrieve the price that the item was sold for in previous orders.

/The current database schema contains a table named OrderDetails. The OrderDetails table contains information about the items sold for each purchase order. OrderDetails stores the product ID, quantities, and discounts applied to each product in a purchase order. The product price is stored in a table named Products.
