Overview
Fabrikam, Inc. is an IT services and hosting provider. Fabrikam has two main data centers. The data centers are located in New York and Montreal. The data centers connect to each other by using high-bandwidth, low latency WAN links. Each data center connects directly to the Internet.
Existing Environment
The network contains an Active Directory forest named fabrikam.com that is dedicated to hosting services. All of the servers in the forest run Windows Server 2012 R2.
The network contains a System Center 2012 R2 infrastructure that includes the following
components:
Windows Azure Pack for Windows Server
Virtual Machine Manager (VMM)
Service Provider Foundation
Operations Manager
Orchestrator
Fabrikam has implemented Hyper-V Network Virtualization in the hosting environment.
All storage is either SAN-based or direct-attached storage (DAS). All VMM library servers use DAS storage. None of the VMM library servers are managed as VMM Hyper-V hosts.
Each Hyper-V host has four 10-GbE network adapters.
Requirements
Business Goals
Fabrikam plans to provide hosting services to two customers named Customer1 and Customer2. Customer1 is based in New York and Customer2 is based in Montreal. IT services will include assistance managing the services in the following table.

The internal network of Customer1 contains a System Center 2012 R2 infrastructure that includes the following components:

network adapter fails. You must be able to control the amount
of bandwidth allocated to iSCSI traffic and Failover
- Clustering redirected traffic. ---
Virtual machines that run in the Fabrikam data centers must
remain available if a
single data center fails. The recovery point objective (RPO)
must be 30 seconds.
The IT staff at Fabrikam must be able to mount iSCSI target
logical units on Hyper-
V hosts directly from the Virtual Machine Manager console.
Hyper-V management and storage traffic must be separated from
the network
traffic generated by virtual machine guests.

site fails, a failover must be invoked manually.
Customer1 Requirements
Fabrikam identifies the following requirements for Customer1:
-- -
Customer1 will use Hyper-V Network Virtualization in its hosted
environment.
Customer1 will require the ability to manage all of its cloud
services from a single
interface.
Each deployment of a virtual machine for Customer1 must trigger
the execution of
a runbook by using the Orchestrator web service. The runbook
