NEW QUESTION: 1

Sie müssen die Firewall-Ports für die Verwendung mit der SQL Server-Umgebung öffnen.

Identifizieren Sie in der folgenden Tabelle den Firewall-Port, den Sie für jeden Dienst verwenden müssen.

HINWEIS: Nehmen Sie in jeder Spalte nur eine Auswahl vor.

Answer:

Explanation:

Explanation:

Report Server: 80

By default, the report server listens for HTTP requests on port 80.

NEW QUESTION: 2

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication. The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:
* WebApp1 is used by the finance department and uses the URL http://finance.contoso.com. * WebApp2 is used by the marketing department and uses the URL http://marketing.contoso.com. You have a Microsoft SharePoint Online environment. External users use the environment to access content. Corporate security policy states that the password of each user account must be changed every three months. You need to recommend a technology to ensure that the internal farm remains operational after the passwords change. What should you include in the recommendation?

- A. service application groups
- B. SharePoint Health Analyzer
- C. cross-firewall access zones
- D. Information Rights Management (IRM)
- E. the Access Services service application
- F. Network Load Balancing (NLB)
- G. Microsoft Visual Studio 2010
- H. the Secure Store Service service application
- I. managed accounts
- J. alternate access mappings
- K. Active Directory Federation Services (AD FS)
- L. a BLOB cache
- M. Remote BLOB Storage (RBS)
- N. an ASP.NET Membership Database
- O. Network Access Protection (NAP)

Answer: I

Explanation:

Section: Large multiple choice

NEW QUESTION: 3

Changing the filename of a file will change the hash value of the file.

- A. False
- B. True

Answer: A

NEW QUESTION: 4

In the HyperMetro active-active data center solution, which of the following statements about the static priority mode used for brain-split prevention is false?

- A. If the non-preferred site fails, LUNs at the preferred site continue to provide services while LUNs at the non-preferred site stop providing services.
- B. If a user powers off the storage system at the preferred site for maintenance purposes, the storage system at the non-preferred site immediately takes over all active-active

services without service interruption.

C. If links between the storage systems are down, LUNs at the preferred site continue to provide services and those at the non-preferred site stop providing services.

D. If the storage system at the preferred site is faulty, the non-preferred site automatically takes over active-active services.

Answer: D
