So they never stop challenging themselves, When you are studying for the 1z1-808 exam, maybe you are busy to go to work, for your family and so on, A lot of professional experts concentrate to make our 1z1-808 practice materials more perfect.

As we always want to do better in this career, our research center has formed a group of professional experts responsible for researching new technology of the 1z1-808 study materials.

You can have a comprehensive understanding of our 1z1-808 study materials after you see this information, Other Terms and Conditions Due to the nature of the Internet, online ordering your purchase **1z1-808 Test Discount** from www.Stegschool.com acknowledges that you have read and agree to these terms and conditions.

Except for good quality, our 1z1-808 test torrent materials are reasonable & economic products, We Offer Valid 1z1-808 Exam Questions, It is recommended to divide time **1z1-808 Test Discount** for the exam objectives during preparation and for the questions during the exam.

Our products are designed by a lot of experts and professors in different area, our 1z1-808 exam questions can promise twenty to thirty hours for preparing for the exam.

Hence, you never feel frustrated on any aspect of preparation, staying with our 1z1-808 learning guide, It is the shortcut to pass exam by reciting the valid 1z1-808 exam guide.

NEW QUESTION: 1

Which of the following statements about a docking station are true?

Each correct answer represents a complete solution. Choose two.

- A.** Docking station is also known as a workstation.
- B.** It allows a laptop to connect to desktop I/O devices such as full-sized keyboards, CRT monitors, etc.
- C.** It is a large circuit board found in a computer on which a CPU is mounted.
- D.** It is a specialized case into which an entire laptop can be

inserted.

Answer: B,D

Explanation:

A docking station is a specialized case into which an entire laptop can be inserted. This allows the laptop to connect to desktop I/O devices such as full-sized keyboards, CRT monitors, etc. Docking stations are highly proprietary items that are designed for use with specific computer models. It is useful for a user who wants to maintain only one computer system and avoid transferring information between two computers. With a docking port and a well-equipped laptop, a user can get the environment of both a laptop and a desktop computer. Answer option C is incorrect. A motherboard is a large circuit board found in a computer on which a CPU is mounted. Answer option B is incorrect. A workstation is a computer in a network from where a user works.

NEW QUESTION: 2

A system administrator created a tenant with URL name "fin" for the finance team. The fully qualified domain name (FQDN) of the appliance is vra.rainpole.local.

What is the correct URL to log in to the finance tenant?

- A. <https://vra.rainpole.local/org/fin>
- B. <https://vra.rainpole.local/vcac/org/finance>
- C. <https://vra.rainpole.local/org/finance>
- D. <https://vra.rainpole.local/vcac/org/fin>

Answer: D

NEW QUESTION: 3

Select and Place:

Answer:

Explanation:

Explanation/Reference:

Small Office

*Redundant Links

*Internet Deployment Model

Medium Office

*Redundant devices

*Private WAN deployment

Large Office

*Redundant Links and Devices

*MPLS Deployment model

Small Branch Design

The small branch design is recommended for branch offices that do not require hardware redundancy and that have a small user base supporting up to 50

users. This profile consists of an access router providing WAN services and connections for the LAN services. The Layer 3 WAN services are based on the WAN and Internet deployment model. A T1 is used for the primary link, and an ADSL secondary link is used for backup. Other network fundamentals are supported, such as EIGRP, floating static routes, and QoS for bandwidth protection.

Medium Branch Design

The medium branch design is recommended for branch offices of 50 to 100 users, which is similar to the small branch but with an additional access router in the WAN edge (slightly larger) allowing for redundancy services.

Large Branch Design

The large branch design is the largest of the branch profiles, supporting between 100 and 1000 users. This design profile is similar to the medium branch design in that it also provides dual access routers in the WAN edge. In addition, dual Adaptive Security Appliances (ASA) are used for stateful firewall filtering, and dual distribution switches provide the multilayer switching component. The WAN services use an MPLS deployment model with dual WAN links into the WAN cloud.

Cisco Press CCDA 640-864 Official Certification Guide Fourth Edition, Chapter 7

NEW QUESTION: 4

Scenario:

A customer network engineer has edited their OSPF network configuration and now your customer is experiencing network issues. They have contacted you to resolve the issues and return the network to full functionality.

The OSPF neighbour relationship has been lost between R1 and R3. What is causing this problem?

- A.** A neighbor statement needs to be configured in R1 and R3 pointing at each other.
- B.** The R1 network type should be changed to point-to-multipoint non-broadcast.
- C.** The hello, dead and wait timers on R1 need to be reconfigured to match the values on R3.
- D.** The serial interface in R1 should be taken out of the shutdown state.

Answer: B

Explanation:

Explanation

In order for two OSPF routers to become neighbors, they must have matching network types across the links.

In this case, we see that R1 has been configured as non-broadcast and R3 is using point to point non-broadcast.

This can be seen by issuing the "show running-config" command on each router, or the "show ip ospf interface" command:
