As the validity of services expires, you can renew the product by just paying [Online CTAL-TAE Version](#) of the real product price, Life is so short, When you click into Stegschool's site, you will see so many people daily enter the website.

Why can our 2V0-81.20 exam cram help you gain the certificates easily, Currently, it is a lifetime study time, Luckily, the 2V0-81.20 preparation materials from our company will help all people to have a good command of the newest information.

All 2V0-81.20 pdf files are based on the requirement of the certification center and we constantly keep the current exam information of 2V0-81.20 exams4sure review to ensure the accuracy of answers.

If you still cannot make your decision on purchasing our product, please try our free demo, The 2V0-81.20 exam torrent is compiled elaborately by the experienced professionals and of high quality.

LATEST VMware VMware Certified Professional 2V0-81.20 EXAM PDF AND EXAM VCE SIMULATOR Stegschool 2V0-81.20 exam questions and answers are written by the most reliable VMware VMware Certified Professional 2V0-81.20 professionals.

100% Pass Quiz VMware 2V0-81.20 Marvelous Exam Simulator Provided you have a strong determination, as well as the help of our 2V0-81.20 quiz torrent materials, you can have success absolutely, And the reasonable 2V0-81.20 test engine files are available with secure monetary protection.

Set the duration of Practice and Virtual tests, assign a passing score percentage, **2V0-81.20 Exam Simulator** and select the questions - and even the order of the questions AND answers, On the other hands, we support multi-channel payment platform with credit card.

You avail our VMware exam preparation material in two easy **2V0-81.20 Exam Simulator** formats, which can easily be accessed on all digital devices without any downloading any additional software.

In order to benefit more candidates, we often give some promotion about our 2V0-81.20 pdf files, Due to the different mailbox settings, some persons cannot receive the 2V0-81.20 study questions.

Here comes 2V0-81.20 exam materials which contain all of the valid 2V0-81.20 study questions, Pass your next exam guaranteed:, If the clients are unlucky to fail in the test we will refund them as quickly as we can.

#### **NEW QUESTION: 1**

Which two statements are correct for the out-of-box configuration for Palo Alto Networks NGFWs? (Choose two)

- A.** The interface are pingable.
- B.** The devices are licensed and ready for deployment.
- C.** A default bidirectional rule is configured that allows Untrust zone traffic to go to the Trust zone.
- D.** The devices are pre-configured with a virtual wire pair out the first two interfaces.
- E.** The management interface has an IP address of 192.168.1.1 and allows SSH and HTTPS connections.

**Answer: B,E**

#### **NEW QUESTION: 2**

HOTSPOT

Your network contains an Active Directory forest named northwindtraders.com.

The client computers in the finance department run either Windows 8.1, Windows 8, or Windows 7. All of the client computers in the marketing department run Windows 8.1. You need to design a Network Access Protection (NAP) solution for northwindtraders.com that meets the following requirements: The client computers in the finance department that run Windows 7 must have a firewall enabled and

the antivirus software must be up-to-date.

The finance computers that run Windows 8.1 or Windows 8 must have automatic updating enabled and

the antivirus software must be up-to-date.

The client computers in the marketing department must have automatic updating enabled and the

antivirus software must be up-to-date.

If a computer fails to meet its requirements, the computers must be provided access to a limited set of

resources on the network.

If a computer meets its requirements, the computer must have full access to the network.

What is the minimum number of objects that you should create to meet the requirements? To answer, select the appropriate number for each object type in the answer area.

Hot Area:

**Answer:**

Explanation:

**NEW QUESTION: 3**

You work as a Server Administrator for company Inc. The company has a Windows-based network environment with client computers running Windows 10 and a Windows Server 2016 server.

The company uses an order-processing application that accesses customer records stored in a database.

The application accesses customer information through a set of WCF Web services.

Which of the following server roles will you configure on the server used in your organization?

- A. Windows Server Virtualization
- B. Network Policy and Access Services
- C. Application Server
- D. DHCP Server

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

You should configure the Windows Server 2016 computer as an application server. Application Server is an expanded server role of Windows Server 2016 that simplifies the process of deploying applications that respond to requests sent over the network from remote applications. Windows Server 2016 provides support for applications by enhancing application availability and accessibility through the Application Server role. The Application Server role provides environment for deploying and running line-of-business (LOB) applications that are built with the Microsoft .NET Framework version 3.0. The features provided by Application Server role are provided in the table below:

During the server role installation, administrators select services that support applications that are designed to use COM+, Message Queuing, Web services, and distributed transactions. Microsoft recommends installing the Application Server role when a custom business application is deployed on the network and the developer has indicated that specific role services are required.

Incorrect Answers:

A: The Windows Server Virtualization role offers services for creating and managing virtual machines and their resources.

B: Network Policy and Access Services (NPAS) is a server role in Windows Server 2008.

The role is a logical grouping of the following related network access technologies:

Network Policy Server (NPS)

Routing and Remote Access

Health Registration Authority (HRA)

Host Credential Authorization Protocol (HCAP)

These technologies are the role services of the NPAS server role. The NPAS server role allows administrators to deploy and operate a virtual private network (VPN), dial-up networking, 802.1x protected wired and wireless access, and Cisco Network Admission Control (NAC)-based devices.

D: The DHCP Server role allows you to centrally manage IP addresses and related information. This also allows you to configure client network settings at a server rather than configuring them on each client computer.

#### **NEW QUESTION: 4**

Refer to the exhibit.

Two S-Series switches are configured as a VLT pair. The output from the first peer switch is as shown.

Which three results can be determined based on the output

shown? (Choose three.)

- A. The restoration of VLT ports after a system has been rebooted has been manually configured.
- B. VLTs downstream to other devices will not form because the versions are the same for both VLT peers.
- C. The domain ID was automatically created based on the System MA.
- D. The command back-up destination command has been applied but there is no IP- reachability for Backup-Link connectivity between Peers.
- E. The System Mac was statically defined by an administrator, and all downstream switches only see this MAC address.
- F. The VLTi peer-link has not been created between the two VLT peers.

**Answer: A,D,E**
