Explanation:

The Non-Owner Mailbox Access Report in the Exchange Administration Center (EAC) lists the mailboxes that have been accessed by someone other than the person who owns the mailbox. Run a non-owner mailbox access report

In the EAC, navigate to Compliance Management > Auditing.

Click Run a non-owner mailbox access report.

By default, Microsoft Exchange runs the report for non-owner access to any mailboxes in the

organization over the past two weeks. The mailboxes listed in the search results have been enabled for mailbox audit logging. To view non-owner access for a specific mailbox, select the mailbox from the list of mailboxes. View the

search results in the details pane.

Note: When a mailbox is accessed by a non-owner, Microsoft Exchange logs information about this action in a mailbox audit log that's stored as an email message in a hidden folder in the mailbox being audited.

Entries from this log are displayed as search results and include a list of mailboxes accessed by a non-owner, who accessed the mailbox and when, the actions performed by the

non-owner, and whether the action was successful.
