NEW QUESTION: 1

What will extend a trust boundary (There is a switch interface configuration with separate voice VLAN and data VLAN to, also showing endpoint

- A. Core Switch
- B. Multiple Layers PC
- C. Access Switch
- D. Distribution Switch
- E. IP Phone

Answer: E

Explanation:

A Catalyst switch can detect an IP phone via CDP and can instruct the phone to extend a trust boundary to its auxiliary data port. The voice traffic from the phone should be implicitly trusted because the phone is both a Cisco device and a small switch that can be configured and controlled.

NEW QUESTION: 2

Your network contains an Active Directory domain named contoso.com. The domain contains an enterprise certification authority (CA).

A user named Admin1 is a member of the Domain Admins group. You need to ensure that you can archive keys on the CA. The solution must use Admin1 as a key recovery agent.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 3

You work as a Network Administrator for Tech-E-book Inc. You are configuring the ISA Server 2006 firewall to provide your company with a secure wireless intranet. You want to accept inbound mail delivery through an SMTP server. What basic rules of ISA Server do you need to configure to accomplish the task.

- A. Publishing rules
- B. Network rules
- C. Access rules

D. Mailbox rules

Answer: A

Explanation:

Publishing rules are applied on SMTP servers to accept inbound mail delivery. There are three basic rules of ISA Server, which are as follows: Access rules: These rules determine what network traffic from the internal network is allowed to access the external network. Publishing rules: These rules are used for controlling access requests from the external network for the internal resources. These types of rules are usually applied to Web servers that are used for providing public access. These are also applied on SMTP servers to accept inbound mail delivery. Network rules: These rules define the traffic source, traffic destination, and the network relationship.

Answer D is incorrect. These rules are set for controlling outbound traffic. Answer B is incorrect. These rules define how to handle the traffic. Answer C is incorrect. There are no such ISA Server rule sets.
