NEW QUESTION: 1

A business analyst needs to prepare the requirements package for her endeavor in a predefined template for her company. What term can be assigned to this standardized template for packaging the requirements?

- A. Derivative adaption
- B. Enterprise environmental factors
- C. Essential
- D. Organizational process assets

Answer: D

Explanation:

Explanation/Reference:

Templates for requirements packages are taken from organizational process assets.

C is incorrect. Essential isn't a valid explanation for this question.

D is incorrect. Enterprise environmental factors aren't where templates originate from for business analyst requirements packages.

B is incorrect. This isn't a valid term for organizational process assets or templates needed by the business analyst.

NEW QUESTION: 2

Refer to the exhibit.

An engineer is designing a guest portal on Cisco ISE using the default

configuration. During the testing phase, the engineer receives a warning when displaying the guest portal. Which issue is occurring?

A. The server that is providing the portal has an expired certificate

B. The server that is providing the portal has a self-signed certificate

C. The connection is using an unsupported protocol

D. The connection is using an unsupported browser

Answer: B

Explanation:

Explanation

If you're a website owner and your website displays this error message, then there could be two reasons why the browser says the cert authority is invalid: + You're using a self-signed SSL certificate, OR + The certificate authority (CA) that issued your SSL certificate isn't trusted by your web browser.
