Compared with other exam candidates, you do not need to worry about the approaching of the exam date, And you can immediately download our 712-50 exam guide files as we provide downloading link and [712-50](#) also you can log in our site with the account and password we provide, and then download any time.

Many excellent talents are urgently needed to fill the vacancy, Our webpage provide you three kinds of 712-50 guide torrent demos to download for free, In our software version the unique point is that [PMP Practice Exams](#) we will provide you the mock examination which will simulate the real exam for you to practice.

There is no exaggeration to say that you will be confident to take part in you 712-50 exam with only studying our 712-50 practice torrent for 20 to 30 hours.

#### **NEW QUESTION: 1**

You configure Azure AD Connect for Azure Active Directory Seamless Single Sign-On (Azure AD Seamless SSO) for an on-premises network.

Users report that when they attempt to access myapps.microsoft.com, they are prompted multiple times to sign in and are forced to use an account name that ends with onmicrosoft.com.

You discover that there is a UPN mismatch between Azure AD and the on-premises Active Directory.

You need to ensure that the users can use single-sign on (SSO) to access Azure resources.

What should you do first?

- A. From the server that runs Azure AD Connect, modify the filtering options.
- B. From the on-premises network, request a new certificate that contains the Active Directory domain name.
- C. From the on-premises network, deploy Active Directory Federation Services (AD FS).
- D. From Azure AD, add and verify a custom domain name.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

Azure AD Connect lists the UPN suffixes that are defined for the domains and tries to match them with a custom domain in Azure AD. Then it helps you with the appropriate action that needs to be taken. The Azure AD sign-in page lists the UPN suffixes that are defined for on-premises Active Directory and displays the corresponding status against each suffix. The status values can be one of the following:

State: Verified

Azure AD Connect found a matching verified domain in Azure AD. All users for this domain can sign in by using their on-premises credentials.

State: Not verified

Azure AD Connect found a matching custom domain in Azure AD, but it isn't verified. The UPN suffix of the users of this domain will be changed to the default .onmicrosoft.com suffix after synchronization if the domain isn't verified.

Action Required: Verify the custom domain in Azure AD.

## **NEW QUESTION: 2**

The ZYX Corporation is in the process of relocating its facilities after several years of planning. The president, who is well aware of the necessity for emergency planning, directs you as the security manager to draw up necessary plans to cope with natural disasters. Which of the following is not a valid assumption to be considered?

- A. In assessing the vulnerability of individual plants and other facilities, environmental, indigenous, and economic factors must be considered.
- B. Each plant and facility must be evaluated in terms of disaster, most likely to occur as well as the facility's capacity to cope with and minimize the effects of the disaster.
- C. Most disasters considered likely will arrive with very little warning.

**D.** Some plants or facilities just are not vulnerable to natural disasters and therefore should not be involved in the planning.

**E.** Most disasters considered likely will have a rapid development and have a potential for substantial destruction.

**Answer: D**

### **NEW QUESTION: 3**

You are a Security Administrator who has installed Security Gateway R77 on your network. You need to allow a specific IP address range for a partner site to access your intranet Web server. To limit the partner's access for HTTP and FTP only, you did the following:

1) Created manual Static NAT rules for the Web server.  
2) Cleared the following settings in the Global Properties &gt; Network Address Translation screen:

-Allow bi-directional NAT

-Translate destination on client side

Do the above settings limit the partner's access?

**A.** Yes. This will ensure that traffic only matches the specific rule configured for this traffic, and that the Gateway translates the traffic after accepting the packet.

**B.** No. The first setting is only applicable to automatic NAT rules. The second setting will force translation by the kernel on the interface nearest to the client.

**C.** Yes. Both of these settings are only applicable to automatic NAT rules.

**D.** No. The first setting is not applicable. The second setting will reduce performance.

**Answer: B**
