NEW QUESTION: 1

Organizational process assets can be divided into which of the following two categories?

- A. Templates, and processes and procedures
- B. Corporate knowledge base and processes and procedures
- C. Project files and corporate knowledge base
- D. Standards, and processes and procedures

Answer: B

Explanation:

Explanation/Reference:

Explanation:

2.1.4 Organizational Process Assets

Organizational process assets are the plans, processes, policies, procedures, and knowledge bases specific to and used by the performing organization. They include any artifact, practice, or knowledge from any or all of the organizations involved in the project that can be used to perform or govern the project. The process assets also include the organization's knowledge bases such as lessons learned and historical information. Organizational process assets may include completed schedules, risk data, and earned value data. Organizational process assets are inputs to most planning processes. Throughout the project, the project team members may update and add to the organizational process assets as necessary.

Organizational process assets may be grouped into two categories: (1) processes and procedures, and (2) corporate knowledge base.

NEW QUESTION: 2

Your organization has moved to AWS and has manually deployed infrastructure using the console. Recently, a decision has been made to standardize on Terraform for all deployments moving forward.

What can you do to ensure that all existing is managed by Terraform moving forward without interruption to existing

services?

- A. delete the existing resources and recreate them using new a Terraform configuration so Terraform can manage them moving forward
- B. using terraform import, import the existing infrastructure into your Terraform state
- C. resources that are manually deployed in the AWS console cannot be imported by Terraform
- D. submit a ticket to AWS and ask them to export the state of all existing resources and use terraform import to import them into the state file

Answer: B

Explanation:

Terraform is able to import existing infrastructure. This allows you to take resources you've created by some other means and bring it under Terraform management.

This is a great way to slowly transition infrastructure to Terraform or to be sure you're confident that you can use Terraform in the future if it currently doesn't support every AWS service or feature you need today.

B is not correct because this does not result in an accurate estimation.

C is correct because this is the proper way to estimate charges.

D is not correct because billing support is available to help you set up billing and understand invoices, not to make estimations.

NEW QUESTION: 4

Welche der folgenden Aussagen wurde ein IS-Prufer fur die kurzfristige Planung einer IS-Abteilung fur das MOST als relevant erachten?

- A. Durchfuhrung einer Selbstbewertung der Kontrolle
- B. Bewertung der Hardwareanforderungen
- C. Immer auf dem neuesten Stand der Technik
- D. Ressourcen zuweisen

Answer: D

Explanation:

Erluterung:

Die IS-Abteilung sollte insbesondere die Art und Weise bercksichtigen, in der die Ressourcen kurzfristig zugewiesen werden. Investitionen in die IT mussen mit Strategien des Top-Managements in Einklang gebracht werden, anstatt sich um der Technologie willen auf Technologie zu konzentrieren. Die Durchfuhrung von Selbstbewertungen der Steuerung und die Bewertung des Hardwarebedarfs sind nicht so wichtig wie die Zuweisung von Ressourcen wahrend der kurzfristigen Planung fur die IS-Abteilung.
