As is known to all, few question banks can C-S4CPS-2105 Exam Introduction definitely make a promise to you that you can pass the exams as long as you are willing to, When we choose the employment work, Free H35-581_V2.0 Sample you will meet a bottleneck, how to let a company to choose you to be a part of him?

Most candidates reflect our AZ-204 test simulate files matches more than 90% with the real exam, Secondly, we are the leading position in this area and we are famous for high quality of AZ-204 dumps torrent materials.

NEW QUESTION: 1
You are upgrading an HPE StoreVirtual LHOS 10 5 to 12 5. What should you do before committing me upgrade?
A. Upgrade me HPE Device Specific Module (DSM) first, if used
B. install a 10 GB Ethernet adapter.
C. Remove the HPE MEM driver, il used.
D. Remove the HPE Device Specific Module (DSM) first if used.
Answer: A

NEW QUESTION: 2
A Solutions Architect must create a cost-effective backup solution for a company's 500MB source code repository of proprietary and sensitive applications. The repository runs on Linux and backs up daily to tape.
Tape backups are stored for 1 year.
The current solutions are not meeting the company's needs because it is a manual process that is prone to error, expensive to maintain, and does not meet the need for a Recovery Point Objective (RPO) of 1 hour or Recovery Time Objective (RTO) of 2 hours. The new disaster recovery requirement is for backups to be stored offsite and to be able to restore a single file if needed.
Which solution meets the customer's needs for RTO, RPO, and

disaster recovery with the LEAST effort and expense?
A. Replace the local source code repository storage with a
Storage Gateway cached volume. Create a snapshot schedule to
take hourly snapshots. Use an Amazon CloudWatch Events schedule
expression rule to run on hourly AWS Lambda task to copy
snapshots from US-EAST -1 to US-WEST-2.
B. Replace the local source code repository storage with a
Storage Gateway stored volume. Change the default snapshot
frequency to 1 hour. Use Amazon S3 lifecycle policies to
archive snapshots to Amazon Glacier and remove old snapshots
after 1 year. Use cross-region replication to create a copy of
the snapshots in US-WEST-2.
C. Replace local tapes with an AWS Storage Gateway virtual tape
library to integrate with current backup software. Run backups
nightly and store the virtual tapes on Amazon S3 standard
storage in US-EAST-1. Use cross-region replication to create a
second copy in US-WEST-2. Use Amazon S3 lifecycle policies to
perform automatic migration to Amazon Glacier and deletion of
expired backups after 1 year?
D. Configure the local source code repository to synchronize
files to an AWS Storage Gateway file Amazon gateway to store
backup copies in an Amazon S3 Standard bucket. Enable
versioning on the Amazon S3 bucket. Create Amazon S3 lifecycle
policies to automatically migrate old versions of objects to
Amazon S3 Standard 0 Infrequent Access, then Amazon Glacier,
then delete backups after 1 year.
Answer: D

NEW QUESTION: 3
Which sequence should be followed for bonus forecast to work?
Please choose the correct answer.
A. Create bonus forecast] Upload Goals file Upload weights and
mappings file
B. Upload Goals file Create bonus forecast] Upload weights and
mapping file Upload goals file
C. Upload goals file] Upload weights and mappings file Create
bonus forecast
D. Upload weights and mappings file] Upload goals file Create
bonus forecast
Answer: B
