**Answer: D**

Explanation:

Explanation  
<https://www.howtogeek.com/howto/6229/how-to-use-bitlocker-on-drives-without-tpm/>If you don't use TPM for protecting a drive, there is no such Virtual TPM or VM Generation, or VM Configuration version requirement, you can even use Bitlocker without TPM Protector with earlier versions of Windows. How to Use BitLocker Without a TPM You can bypass this limitation through a Group Policy change. If your PC is joined to a business or school domain, you can't change the Group Policy setting yourself. Group policy is configured centrally by your network administrator. To open the Local Group Policy Editor, press Windows+R on your keyboard, type "gpedit.msc" into the Run Navigate to Local Computer Policy > Computer Configuration > Administrative Templates BitLocker Drive Encryption > Operating System Drives in the left pane.

Double-click the "Require additional authentication at startup" option in the right pane.

Select "Enabled" at the top of the window, and ensure the "Allow BitLocker without a compatible TPM (requires a password or a startup key on a USB flash drive)" checkbox is enabled here. Click "OK" to save your changes. You can now close the Group Policy Editor window. Your change takes effect immediately-you don't even need to reboot.

**NEW QUESTION: 2**

- A. Option D
- B. Option B
- C. Option A
- D. Option C

**Answer: B**

Explanation:

Explanation  
A table-valued user-defined function can also replace stored
