NEW QUESTION: 1

How do i configure New service providers in FI

- A. Using Admin UI Menu Option
- B. Change the FI Configuration in core data base
- C. None of the options are correct
- D. Writing Java Code

Answer: A

NEW QUESTION: 2

- A. Option B
- B. Option D
- C. Option C
- D. Option A

Answer: C

Explanation:

Windows System Image Manager (Windows SIM) is the tool used to create unattended Windows Setup answer files. The creation of an answer file is achieved by using information from a Windows image (.wim) file and a catalog (.clg) file. Component settings are added to a configuration pass in the answer file. You can also add packages to be installed during Windows Setup.

NEW QUESTION: 3

Your network contains an Active Directory domain named contoso.com. The domain contains two member servers named Server1 and Server2. All servers run Windows Server 2012 R2. Server1 and Server2 are nodes in a Hyper-V cluster named Cluster1. Cluster1 hosts 10 virtual machines.

All of the virtual machines run Windows Server 2012 R2 and are members of the domain.

You need to ensure that the first time a service named Service1 fails on a virtual machine, the virtual machine is moved to a different node.

You configure Service1 to be monitored from Failover Cluster Manager.

What should you configure on the virtual machine?

- A. From the Recovery settings of Service1, set the First failure recovery action to Take No Action.
- B. From the General settings, modify the Service status.
- C. From the Recovery settings of Service1, set the First failure recovery action to Restart the Service.
- D. From the General settings, modify the Startup type.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

When a monitored service fails the Recovery features of the service will take action.

Example:

In this case for the first failure the service will be restarted by the Service Control Manager inside the guest operating system, if the service fails for a second time the service will again be restarted via guest operating system. In case of a third failure the Service Control Manager will take no action and the Cluster service running on the Hyper-V host

will take over recovery actions.

NEW QUESTION: 4

The scheme in which the same vendor is receiving favorable treatment can be found in purchases by vendor searches.

A. False

B. True

Answer: B
