NEW QUESTION: 4
You want to prevent a group of users in your database from
performing long-running transactions that
consume huge amounts of space in the undo tablespace. If the
quota for these users is exceeded during
execution of a data manipulation language (DML) statement, the
operation should abort and return an
error. However, queries should still be allowed, even if users
have exceeded the undo space limitation.
How would you achieve this?
A. Implement a profile for these users.
B. Specify the maximum amount of quota a user can be allocated
in the undo tablespace.
C. Decrease the number of Interested Transaction List (ITL)
slots for the segments on which these users
perform transactions.
D. Implement a Database Resource Manager plan.
Answer: D
