NEW QUESTION: 1
A protocol state machine can be used to describe which aspect
of a component?
A. configuration of an assembly
B. external contract of a component
C. internals of a component
D. signal flow among connectors
Answer: B

NEW QUESTION: 2
Ihr Unternehmen verfügt über eine Buchhaltungsabteilung.
Das Netzwerk enthält eine Active Directory-Domäne mit dem
Namen contoso.com. Die Domain enthält 10 Server.
Sie stellen einen neuen Server mit dem Namen Server11 bereit,
auf dem Windows Server 2016 ausgeführt wird.
Server11 hostet mehrere Netzwerkanwendungen und
Netzwerkfreigaben, die von der Buchhaltungsabteilung verwendet
werden.
Sie müssen eine Lösung für Server11 empfehlen, die die
folgenden Anforderungen erfüllt:
-Schützt Server11 vor Adress-Spoofing und Sitzungs-Hijacking
-Ermöglicht es nur den Computern in der Buchhaltungsabteilung
von We, eine Verbindung zu Server11 herzustellen. Was sollten
Sie zur Implementierung empfehlen?
A. Nur genug Verwaltung (JEA)
B. Privilegierte Zugriffsverwaltung (PAM)
C. AppLocker-Regeln
D. Verbindungssicherheitsregeln
Answer: D
Explanation:
Explanation
In IPsec connection security rule, the IPsec protocol verifies
the sending host IP address by utilize integrity functions like
Digitally signing all packets.If unsigned packets arrives
Server11, those are possible source address spoofed packets,
when usingconnection security rule in-conjunction with inbound
firewallrules, you can kill those un-signed packets with the
action "Allow connection if it is secure" to prevent
spoofingand session hijacking attacks.

NEW QUESTION: 3
You need to ensure that all required sites can use
microblogging features for collaboration.
Which two actions should you perform? (Each correct answer
presents part of the solution. Choose two.)
Case Study Title (Case Study):
Topic 3, Blue Yonder Airlines Background General Background You
are the SharePoint administrator for Blue Yonder Airlines. The
company currently has a SharePoint

2010 environment. It is your responsibility to install and configure a SharePoint 2013 environment that will be used for information management and collaboration, both internally and with external partners. You must also migrate the existing SharePoint environment to SharePoint 2013.

Blue Yonder works with several external partners, including those described in the following table.

Blue Yonder collaborates with Wingtip Toys and Tailspin Toys to design, manufacture, and sell airline-related toys to customers. The Blue Yonder board of directors expects the collaborative design process to become more effective as a result of implementing SharePoint 2013.

Technical Background

All existing servers run Windows Server 2008 R2. The network infrastructure contains an Active Directory Domain Services (AD DS) environment. The internal AD DS domain is named blueyonderairlines.com. User-specific contact information is stored and managed in AD DS. All employees are located in the ActiveUsers organizational unit (OU). Active Directory Federation Services (AD FS) is deployed in the LAN. Two AD FS proxy servers are deployed in the perimeter network. Users log on to client computers by using the syntax

Blue Yonder provides access to the SharePoint environment to partners through individual URLs for each partner company. Each partner company has a dedicated web application and site collection. The following table describes the access URLs.

In preparation for the upgrade you maximize the default upload limits for each web application.

Blue Yonder has an existing managed metadata service containing managed metadata and content types. The content types have workflows. You create a new managed metadata service connection for the Wingtip Toys web application.

A workflow created by Blue Yonder moves information through the product lifecycle. Each access URL specifies a separate web application, site collection, and site.

Business Requirements

The SharePoint environment must meet the following business requirements:

-Provide an environment where toy design, manufacturing, and sales information can be shared between Blue Yonder and partner companies.

-Provide a training site for internal and external users.

-Allow content authors of training materials to upload documents, large image files, and large video files for consumption by internal and external users.

-Allow users to sort content by category.

-Ensure that users from Wingtip Toys or Tailspin Toys can access content only in their own areas of the portal.

-Prevent users from Wingtip Toys and Tailspin Toys from adding terms or creating enterprise keywords.

-Content types and keywords must be shared between sites, site collections, and web applications.
-Simplify search processes by collecting unique characteristics and information about each uploaded item.
-Allow administrators to promote search query results across the entire environment.
-Allow resource coordinators from Blue Yonder to find temporary staffing options from Margie's Travel contractors and employees.
-Provide opportunities for social interaction between employees, contractors, and external contacts to promote idea generation and socialization.
-Utilize site feeds on all collaborative sites.
-Replicate profile information in the https://blueyonderairlines.com site to partner sites.
-Ensure that third-party vendors can read and modify documents.
-For publishing sites, use only friendly URLs that do not contain anything other than the direct address. Avoid URL constructions such as /Lists/Posts/Post.aspx?ID = 568.
Site content must meet the following requirements:
Individual training videos must be in single files, and presented on the training site.
Changes to confidential documents must be logged.
Technical Requirements
You must meet the following technical requirements:
Store all large files outside of the SharePoint content database or databases.
-All servers must run on virtual machines.
-Ensure that search queries are handled by web servers.
-Ensure that all lists support multiple content types.
A. Enable the Following Content feature on each team site.
B. Enable the Site Feeds feature on each My Site.
C. Enable the Site Feeds feature on each team site.
D. Enable self-service site creation on the web application that contains the team sites.
Answer: A,B
Explanation:
Note:
* Setting up My Sites is the first step in configuring microblog features in SharePoint Server 2013.
