When you choose Stegschool's Dumps for your SAP C-THR95-2105 exam preparation, you get the guarantee to pass C-THR95-2105 exam in your first attempt, An ambitious person will march forward courageously.

We also fully consider the characteristics of the user on studying the C-THR95-2105 exam questions, Free Demo and Updates, Get 100% Real SAP Certified Application Associate - SAP SuccessFactors Career Development Planning and Mentoring 1H/2021 Exam Questions With Verified Answers As Seen in the Real Exam.

A potential employer immediately saw a candidate with these qualifications.

NEW QUESTION: 1

You have a domain controller named DC1 that runs Windows Server 2008 R2.

DC1 is configured as a DNS Server for contoso.com.

You install the DNS Server role on a member server named Server1 and then you create a standard secondary zone for contoso.com.

You configure DC1 as the master server for the zone.

You need to ensure that Server1 receives zone updates from DC1. What should you do?

A. On Server1, add a conditional forwarder.

B. Add the Server1 computer account to the DNSUpdateProxy group.

C. On DC1, modify the zone transfer settings for the contoso.com zone.

D. On DC1, modify the permissions of contoso.com zone.

Answer: C

Explanation:

Modify Zone Transfer Settings

You can use the following procedure to control whether a zone will be transferred to other servers and which servers can receive the zone transfer.

To modify zone transfer settings using the Windows interface

1. Open DNS Manager.

2. Right-click a DNS zone, and then click Properties.

3. On the Zone Transfers tab, do one of the following:

- To disable zone transfers, clear the Allow zone transfers check box.

- To allow zone transfers, select the Allow zone transfers check box.

4. If you allowed zone transfers, do one of the following:

- To allow zone transfers to any server, click To any server.

- To allow zone transfers only to the DNS servers that are listed on the Name Servers tab, click Only to servers listed on the Name Servers tab.

- To allow zone transfers only to specific DNS servers, click Only to the following servers, and then add the IP address of one or more DNS servers.

NEW QUESTION: 2

Which of the following ports can only belong to one VLAN.

A. access

B. hybrid

C. eth-trunk

D. trunk

Answer: A

NEW QUESTION: 3

You have a customer who wants to install Windows XP professional on her computer. What is the minimum amount of RAM she must have for this to work?

A. 2 Gigabytes

B. 64 Megabytes

C. 128 Megabytes

D. 1 Gigabyte

Answer: B

Explanation:

64 Megabytes is the minimum. Now, this may seem odd as many

modern machines come with 1, 2, or even 4 gigabytes of RAM. Remember, we are asking in this question what the minimum amount of RAM is. You should absolutely consider getting more RAM.

What are the minimum requirements for installing Windows XP Professional?

The minimum requirements for installing Windows XP Professional are:

Processor: Pentium II processor running at 233MHz or faster.

RAM: 64MB minimum. Microsoft recommends 128MB RAM.

Hard Disk Drive: 1.5GB of free hard disk space for boot partition. More space will be needed if installing over a network.

Video Card and Monitor: Running at VGA resolution or higher.

Network Card: PXE-enabled

or a network boot disk and network card for network-based installation. Other Appliances:

CD-ROM or DVD drive for CD-ROM-based and DVD-based installations, Keyboard and

pointing device. Answer options D, A, and C are all incorrect.

Obviously more RAM is

always a good idea, but these numbers are not the minimum requirements.

NEW QUESTION: 4

ASP.NET Core MVC Web application, the application's startup code is shown below. The application's main method is shown in the following code fragment. Which code fragment should be used to ensure that the application's main method is executed in the context of the application's startup code?

```
public static void Main(string[] args)
{
    // Code fragment
}
```

- A. `vh`
- B. `ãf¬ãf`
- C. `å...è§'`
- D. `px`

Answer: C
