Web ACLs

The Web ACLs table displays the filters configured on the security appliance applicable to Clientless SSL VPN traffic. The table shows the name of each access control list (ACL), and below and indented to the right of the ACL name, the access control entries (ACEs) assigned to the ACL. Each ACL permits or denies access permits or denies access to specific networks, subnets, hosts, and web servers. Each ACE specifies one rule that serves the function of the ACL. You can configure ACLs to apply to Clientless SSL VPN traffic. The following rules apply: * If you

do not configure any filters, all connections are permitted. * The security appliance supports only an inbound ACL on an interface. * At the end of each ACL, an implicit, unwritten rule denies all traffic that is not explicitly permitted. You can use the following wildcard characters to define more than one wildcard in the Webtype access list entry: * Enter an asterisk "*" to match no characters or any number of characters. * Enter a question mark "?" to match any one character exactly. * Enter square brackets "[]" to create a range operator that matches any one character in a range. The following examples show how to use wildcards in Webtype access lists. * The following example matches URLs such as http://www.cisco.com/ and http://wwz.caco.com/:

NEW QUESTION: 3

You are a functional consultant for Contoso Entertainment System USA (USMF).

You need to implement a quarterly accruals scheme for USMF. The accrual scheme settings must match the settings of the monthly and annual accrual schemes.

To complete this task, sign in to the Dynamics 365 portal.

Answer:

Explanation:

See explanation below.

Explanation

Look at the monthly and annual accrual scheme settings. Create a quarterly accrual scheme with the same settings by using the following instructions:

- * Go to Navigation pane > Modules Accrual schemes.
- * Select New.
- * In the Accrual identification
- * In the Description of accrual scheme
- * In the Debit field, specify the desired values. The main account defined will replace the debit main account on the journal voucher line and it will also be used for the reversal of the deferral based on the ledger accrual transactions.
- * In the Credit field, specify the desired values. The main account defined will replace the credit main account on the journal voucher line and it will also be used for the reversal of the deferral based on the ledger accrual transactions.
- * In the Voucher field, select how you want the voucher determined when the transactions are posted.
- * In the Description field, type a value to describe the transactions that will be posted.
- * In the Period frequency field, select how often the transactions should occur.
- * In the Number of occurrences by period field, enter a number.
- * In the Post transactions field, select when the transactions should be posted, such as Monthly.
