NEW QUESTION: 1
You have a server named Server1 in a workgroup.
You need to configure a Group Policy setting on Server1 that will apply to only non-administrative users.

What should you do?
A. Open Local Group Policy Editor. From the View menu, modify the Customize settings.
B. Open Local Users and Groups,
C. Open Local Group Policy Editor. From the File menu, modify the Options settings.
D. Run mmc.exe Add the Group Policy Object Editor snap-in and change the Group Policy object (GPO).
Answer: C

NEW QUESTION: 2
View the following exhibit.

Which one of the following statements is true regarding installation targets in use Install On column?
A. Policy seq=3 will be installed on the Trainer[NAT] VDOM only
B. Policy seq=3 will be not installed on any managed device
C. Policy seq=3 will be installed on all managed devices and VDOMs that are listed under Installation Targets
D. The Install On column value represents successful installation on the managed devices
Answer: C
Explanation:
Seq #3 shows "Installation Targets" as the selected Install On Devices/VDOMs. This is the default icon/value which would default to ALL Devices/VDOMs listed in the 'Installation Targets' section in the Shared Package tree. This is what you would see if you've never changed the Install On "Installation Targets".
The default icon/value will change from Installation Targets to whichever Install On targets you select for that particular seq#. Therefore, for example, seq #1 will install on Remote-Fortigate > Student VDOM and Local-FortiGate > root VDOM. In seq #2 will install on Remote-FortiGate > Student VDOM only.
