B. Dogs will be a logical standby database.
C. Cats will be an enabled logical standby database.
D. Dogs will be a physical standby database.
E. Sheep will be the primary database.
Answer: B,C,E
Explanation:
Explanation
A switchover is a role reversal between the primary database and one of its standby databases. A switchover guarantees no data loss and is typically done for planned maintenance of the primary system. During a switchover, the primary database transitions to a standby role, and the standby database transitions to the primary role.
