Besides, you can have more opportunities [C_THR95_2105](#) and challenge that will make your life endless possibility.

NEW QUESTION: 1

Given two stateless session beans, ABean and BBean:

A client that is not executing within a transaction acquires an EJB reference to ABean and invokes the a() method on time. How many distinct transactions are started by the container after all processing has completed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Explanation/Reference:

Client transaction context does not propagate with an asynchronous method invocation. From the Bean Developer's view, there is never a transaction context flowing in from the client. This means, for example, that the semantics of the REQUIRED transaction attribute on an asynchronous method are exactly the same as REQUIRES_NEW.

NEW QUESTION: 2

SDN advocates overlay service cloudification and underlay hardware standardization.

- A. TRUE
