NEW QUESTION: 1
Identify the missing word in the following sentence.
The purpose of the service configuration management practice is to ensure that accurate and reliable
information about the configuration of services, and the [?] that support them, is available when and where it is needed.
A. customers

B. suppliers
C. assets
D. CIs
Answer: D

NEW QUESTION: 2
Your network contains a server named DC1 that has the DHCP Server server role installed.
You discover the following warning message in the Event log on DC1: "There were orphaned entries deleted in the configuration due to the deletion of a class and option definition. Please recheck the server configuration."
You need to resolve the warning message.
What should you do?
A. Configure name protection.
B. Reconcile the scope.
C. Modify the start address.
D. Compact the database.
E. Restore the database from a backup.
F. Configure Routing Information Protocol version 2 (RIPv2) on the router
G. Configure Open Shortest Path First (OSPF) on the router.
H. Configure a DHCP Relay Agent.
I. Authorize DC1 in Active Directory.
J. Increase the database cleanup interval.
K. Configure DHCP link layer-based filtering.
Answer: B
Explanation:
Resolve Reconcile the DHCP scope In the DHCP snap-in, reconcile the DHCP scope.
To perform these procedures, you must be a member of the Administrators group, or you
must have been delegated the appropriate authority.
To reconcile a DHCP scope:
At the DHCP server, click Start, point to Administrative Tools, and then click DHCP.
In the console tree, click the scope you want to configure.
On the Action menu, click Reconcile.
In the Reconcile dialog box, click Verify.
If the verification indicates that the scope is consistent, click OK.
If the scope is not consistent, select the displayed IP addresses that need to be reconciled,
and then click
Reconcile to repair inconsistencies.
Ensure that there are no discrepancies in the options, classes, or other information
configured for each scope.
Verify
To perform these procedures, you must be a member of the Administrators group, or you

must have been delegated the appropriate authority.
To verify that DHCP scopes are configured properly and reconciled, confirm that the DHCP
snap-in displays the green up arrow icon for Scope:
At the DHCP server, click Start, point to Administrative Tools, and then click DHCP.
In the console tree, click the scope you want to verify. The green up arrow icon should be
displayed.
On the Action menu, click Reconcile.
In the Reconcile dialog box, click Verify.
If the verification indicates that the scope is consistent, click OK.

NEW QUESTION: 4
A customer has reported degraded performance with several of the applications that run on a VNX. After going through the performance data on the array, you find that all the performance issues are centered around the same RAID 6 group, and that the RAID group is supplying 50 percent less IOPS than before.
What is the most likely reason?
A. The RAID group is being rebuilt.
B. Write cache is not configured.
C. The RAID group is trespassed.
D. The RAID group is being defragmented.
Answer: A
