Refer AWS documentation - Lambda Best Practices

Take advantage of Execution Context reuse to improve the performance of your function. Make sure any externalized configuration or dependencies that your code retrieves are stored and referenced locally after initial execution. Limit the re-initialization of variables/objects on every invocation. Instead use static initialization/constructor, global/static variables and singletons. Keep alive and reuse connections (HTTP, database, etc.) that were established during a previous invocation.

NEW QUESTION: 3

In Check Point, Domain-based VPN's take precedence over route-based VPN. If implementing a route-based VPN, what is one configuration step you must make on the gateway object taking part in the route-based VPN?

- A. You need to create a new simple group with no objects in it and apply this as the VPN domain under that gateway's topology tab.
- B. Check Point does not support route-based VPN's.
- C. You should check the "Use route-based VPN" checkbox in the community properties.
- D. You should remove the gateway from all communities.

Answer: A
