### NEW QUESTION: 2

A network engineer is troubleshooting connectivity issues with a directly connected RIPng neighbor. Which command should directly connected RIPng neighbor adjacencies only?

- A. router#show ipv6 rip next-hops
- B. router#show ipv6 rip database
- C. router#show ipv6 routers
- D. router#show ip rip neighbors

**Answer: A**

### NEW QUESTION: 3

What should you use to implement the code quality restriction on the release pipeline for the investment planning applications suite?

- A. a trigger
- B. a deployment gate
- C. a post-deployment approval
- D. a pre deployment approval

**Answer: D**

Explanation:

When a release is created from a release pipeline that defines approvals, the deployment stops at each point where approval is required until the specified approver grants approval or rejects the release (or re-assigns the approval to another user).

Scenario: Code quality and release quality are critical. During release, deployments must not proceed between stages if any active bugs are logged against the release.
