NEW QUESTION: 1
HOTSPOT
Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2. Server1 has the Network Policy Server server role installed. Server2 has the DHCP Server server role installed. Both servers run Windows Server 2012 R2.
You are configuring Network Access Protection (NAP) to use DHCP enforcement.
You configure a DHCP scope as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that non-compliant NAP clients receive different DHCP options than compliant NAP clients.
What should you configure on each server? To answer, select the appropriate options for each server in the answer area.
Hot Area:

Answer:
Explanation:

Explanation/Reference:
Explanation:
Health Policies
Server Options
* Health policy on the NAP server.
* The DHCP server must be NAP enabled.
Note: With DHCP enforcement, a computer must be compliant to obtain an unlimited access IP address configuration from a DHCP server. For noncompliant computers, network access is limited by an IP address configuration that allows access only to the restricted network. DHCP enforcement enforces health policy requirements every time a DHCP client attempts to lease or renew an IP address configuration. DHCP enforcement also actively monitors the health status of the NAP client and renews the IPv4 address configuration for access only to the restricted network if the client becomes noncompliant.

NEW QUESTION: 3

You have a computer that runs Windows 7. The computer is configured to automatically download and install updates. You install Microsoft Office 2007.
You need to ensure that service packs for Office are automatically installed.
What should you do?
A. Create a folder named Updates in C:\Program Files\Microsoft Office. Install the Office Update Inventory Tool into the Updates folder.
B. From Windows Update, select Get updates for other Microsoft products.
C. Download and install the Office 2007 administrative template and disable the Block updates from the Office Update Site from applying policy.
D. From Windows Update, select Restore hidden updates.
Answer: B
Explanation:
Use Windows Update to Check for Updates to other Microsoft Products By default, Windows Update can download and install updates for Windows 7 and features that are part of the operating system (such as Internet Explorer). You can also merge the functionality of Microsoft Update-a service for managing updates to Microsoft Office and several other Microsoft products-into Windows Update so that you no longer need to visit Office Online to get updates.If you do not already have Windows Update integrated with Microsoft Update, you will see the message "Get updates for other Microsoft products" on the Windows Update home page. To enable checking for other products, click the Find Out More option shown beside this message. This will take you to the Microsoft Update site for some quick installation steps. You only need to do this once. Thereafter, the Windows Update home page will indicate that you receive updates "For Windows and other products from Microsoft Update."
