If you buy our H12-723\_V3.0 study questions, you can enjoy the similar real exam environment.

#### **NEW QUESTION: 1**

##### SIMULATION

You are a functional consultant for Contoso Entertainment System USA (USMF).

You need to ensure that a user named Alicia receives an alert notification each time a new release product is added from the product master list. The alert must contain the word Products. To complete this task, sign in to the Dynamics 365 portal.

**A.** \* Open the page that contains the data to monitor (Released Products)

\* On the Action Pane, on the Options tab, in the Share group, select Create alert rule.

\* In the Create alert rule dialog box, on the Alert me when FastTab, in the Event field, select Record has been created.

\* On the Alert me for FastTab, select the desired option. If you want to send the alert as a business event, ensure that Organization-wide is set to No.

\* On the Alert me with FastTab, in the Subject field, enter an appropriate subject (The word Products should be included in the Subject or Message text for this question).

\* In the Message field, enter an optional message. The text is used as the message that you receive when an alert is triggered.

\* Select OK to save the settings and create the alert rule.

**B.** \* Open the page that contains the data to monitor (Released Products)

\* On the Action Pane, on the Options tab, in the Share group, select Create alert rule.

\* In the Create alert rule dialog box, on the Alert me when FastTab, in the Event field, select Record has been created.

\* On the Alert me for FastTab, select the desired option. If you want to send the alert as a business event, ensure that Organization-wide is set to No.

\* On the Alert me with FastTab, in the Subject field, enter an appropriate subject

\* In the Message field, enter an optional message. The text is used as the message that you receive when an alert is triggered.

\* Select OK to save the settings and create the alert rule.

**Answer: A**

**A.** Go to class-run cpstop | Run cpstar

**B.** Go to class-Run cpconfig | Configure CoreXL to make use of the additional Cores | Exist cpconfig | Reboot security Gateway.

**C.** Administrator does not need to perform any task. Check Point will make use of the newly installed

CPU and Cores.

D. Go to clash-cpconf | Configure CoreXl to make use of the additional Core | Exit cpconfig | Reboot Gateway | install security policy.

**Answer: D**

**NEW QUESTION: 3**

AWS Identity and Access

Management. The default policy for the root user is "AdministratorAccess". This policy grants the root user full access to all AWS services and resources. To restrict access, you can create a custom policy that allows only the actions you need. For example, you can create a policy that allows the root user to only view IAM users and groups.

A. The root user has full access to all AWS services and resources. To restrict access, you can create a custom policy that allows only the actions you need. For example, you can create a policy that allows the root user to only view IAM users and groups.

B. The root user has full access to all AWS services and resources. To restrict access, you can create a custom policy that allows only the actions you need. For example, you can create a policy that allows the root user to only view IAM users and groups.

C. The root user has full access to all AWS services and resources. To restrict access, you can create a custom policy that allows only the actions you need. For example, you can create a policy that allows the root user to only view IAM users and groups.

D. The root user has full access to all AWS services and resources. To restrict access, you can create a custom policy that allows only the actions you need. For example, you can create a policy that allows the root user to only view IAM users and groups.

E. The root user has full access to all AWS services and resources. To restrict access, you can create a custom policy that allows only the actions you need. For example, you can create a policy that allows the root user to only view IAM users and groups.

**Answer: A, D**

Explanation:

[https://docs.aws.amazon.com/IAM/latest/UserGuide/reference\\_policies\\_evaluation-logic.html](https://docs.aws.amazon.com/IAM/latest/UserGuide/reference_policies_evaluation-logic.html) By default, all requests are implicitly denied. (Alternatively, by default, the AWS account root user has full access.) An explicit allow in an identity-based or resource-based policy overrides this default. If a permissions boundary, Organizations SCP, or session policy is present, it might override the allow with an implicit deny. An explicit deny in any policy overrides any allows.
