H12-811-ENU PDF version is printable, and you can study anytime.

#### **NEW QUESTION: 1**

You work as a project manager for BlueWell Inc. You with your team are using a method or a (technical) process that conceives the risks even if all theoretically possible safety measures would be applied. One of your team member wants to know that what is a residual risk. What will you reply to your team member?

- A.** It is a risk that will remain no matter what type of risk response is offered.
- B.** It is a risk that remains after planned risk responses are taken.
- C.** It is a risk that can not be addressed by a risk response.
- D.** It is a risk that remains because no risk response is taken.

**Answer: B**

Explanation:

Explanation/Reference:

Explanation: Residual risks are generally smaller risks that remain in the project after larger risks have been addressed. The residual risk is the risk or danger of an action or an event, a method or a (technical) process that still conceives these dangers even if all theoretically possible safety measures would be applied. The formula to calculate residual risk is (inherent risk) x (control risk) where inherent risk is (threats vulnerability). Answer: B is incorrect. This is not a valid statement about residual risks. Answer: C is incorrect. This is not a valid statement about residual risks. Answer: A is incorrect. This is not a valid statement about residual

risks.

**NEW QUESTION: 2**

Cisco Firepower Management

Center. The number of sessions that can be tracked by the Cisco Firepower Management Center is 100,000.

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

**NEW QUESTION: 3**

What happens when you define a calibration session owner? Please choose the correct answer.

Response:

- A. The reporting chain of the owner can automatically populate session participants and subjects.
- B. The owner can view their Calibration data on the Executive Review tab.
- C. The calibration template and session name are defined by the owner.
- D. The calibration session can be assigned to only one owner.

**Answer: A**

**NEW QUESTION: 4**

Your company has an Active Directory domain. A server named Server2 runs Windows

Server 2008 R2. All client computers run Windows 7.

You install the Remote Desktop Services server role, RD Web Access role service, and RD Gateway role service on Server2.

You need to ensure that all client computers have compliant firewall, antivirus software, and antispyware.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Configure Network Access Protection (NAP) on a server in the domain.
- B. Add the Remote Desktop Services servers to the Windows Authorization Access domain local security group.
- C. Enable the Request clients to send a statement of health option in the Remote Desktop client access policy.
- D. Add the Remote Desktop Services client computers to the Windows Authorization Access domain local security group.

**Answer: A,C**

Explanation:

Explanation To ensure that all client machines have firewall, antivirus software and anti-spyware software installed, you

should set the Request clients to sent a health option statement in the Remote Desktop Services client access policy and install and configure Network Access Protection (NAP) on the server in the domain.
