Answer:
Explanation:

Explanation

Once the VNets are peered, all resources on one VNet can communicate with resources on the other peered VNets. You plan

to enable peering between Paris-VNet and AllOffices-VNet.
Therefore VMs on Subnet1, which is on Paris-VNet and VMs on
Subnet3, which is on AllOffices-VNet will be able to connect to
each other.
All Azure resources connected to a VNet have outbound
connectivity to the Internet by default. Therefore VMs on
ClientSubnet, which is on ClientResources-VNet will have access
to the Internet; and VMs on Subnet3 and Subnet4, which are on
AllOffices-VNet will have access to the Internet.
