- A. An editor to modify the data model in the extended project
- B. The Descriptor Editor to choose elements for extension
- C. The Extensibility Pane to extend the control possibility
- D. A wizard to generate the files for each extension

Answer: C,D

NEW QUESTION: 2

or more Web applications. In real time or near-real time, it monitors traffic before it reaches the Web application, analyzing all requests using a rule base to filter out potentially harmful traffic or traffic patterns. Web application firewalls are a common security control used by enterprises to protect Web applications against zero-day exploits, impersonation and known vulnerabilities and attackers.

Incorrect Answers:

B: Input validation is used to ensure that the correct data is entered into a field. For example, input validation would prevent letters typed into a field that expects number from being accepted. Input validation is not an effective defense against an XSS attack.

C: Security information and event management (SIEM) is an approach to security management used to provide a view of an organization's IT security. It is an information gathering process; it does not in itself provide security.

D: Sandboxing is a process of isolating an application from other applications. It is often used when developing and testing new application. It is not used to defend against an XSS attack.

E: DAM (digital asset management) is a system that creates a centralized repository for digital files that allows the content to be archived, searched and retrieved. It is not used to defend against an XSS attack.

NEW QUESTION: 4

Which of the following help(s) prevent an organization's systems from participating in a distributed denial-of-service (DDoS) attack?

- A. Using access control lists (ACLs) to restrict inbound connection attempts
- B. Recentralizing distributed systems
- C. Inbound traffic filtering
- D. Outbound traffic filtering

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Outbound traffic filtering can help prevent an organization's systems from participating in a distributed denial-of-service (DDoS) attack.
