NEW QUESTION: 1

An infrastructure team is at the end of a procurement process and has selected a vendor. As part of the final negotiations, there are a number of outstanding issues, including:

1. Indemnity clauses have identified the maximum liability
2. The data will be hosted and managed outside of the company's geographical location

The number of users accessing the system will be small, and no sensitive data will be hosted in the solution. As the security consultant on the project, which of the following should the project's security consultant recommend as the NEXT step?

- A.** Require the solution owner to accept the identified risks and consequences
- B.** Review the entire procurement process to determine the lessons learned
- C.** Mitigate the risk by asking the vendor to accept the

in-country privacy principles

D. Develop a security exemption, as it does not meet the security policies

Answer: A

NEW QUESTION: 2

A gaming organization is developing a new game and would like to offer real-time competition to their users. The data architecture has the following characteristics:

The game application is writing events directly to Amazon DynamoDB from the user's mobile device.

Users from the website can access their statistics directly from DynamoDB.

The game servers are accessing DynamoDB to update the user's information.

The data science team extracts data from DynamoDB for various applications.

The engineering team has already agreed to the IAM roles and policies to use for the data science team and the application. Which actions will provide the MOST security, while maintaining the necessary access to the website and game application? (Choose two.)

A. Create an IAM policy with PUT permission for the game application and an IAM policy with GET permission for the website.

B. Create an IAM policy with PUT permission for both the website and the game application.

C. Use IAM identity federation to authenticate to both the website and the game application.

D. Create an IAM policy with fine-grained permission for both the website and the game application.

E. Use Amazon Cognito user pool to authenticate to both the website and the game application.

Answer: A,C

NEW QUESTION: 3
