You can find different types of JN0-349 dumps on our website, which is a best choice, As the leader in this career, we have been considered as the most popular exam materials provider.

With the best Enterprise Routing and Switching, Specialist (JNCIS-ENT) study material, you can have a goof preparation about your actual test, JN0-349 PDF Dumps and Practice Test For Instant Success, They are reflection of our experts' authority.

NEW QUESTION: 1

You are an Independent Software Vendor (ISV) developer and are reviewing another developer's changes to a project.

You run the Best Practices Fixer on the project. The following error message appears in the error list in Visual Studio for the display menu item XYZ:

```
BP Rule: [BPErrorMenuItemNotCoveredByPrivilege]:Path:
```

```
[dynamics://MenuItemDisplay/
```

```
XYZ]:BPErrorMenuItemNotCoveredByPrivilege: 'AxMenuItemDisplay'  
'XYZ' is not covered by privilege: XYZ (USR) [YourModule] Based  
on this error message, which recommendation should you make to  
the developer?
```

A. Add the XYZ display menu item to the Entry Points of a new or existing Security Privilege in the YourModule model.

B. Set the Linked Permission Type property to Form, and the Linked Permission Object property to the name of the form on

the XYZ display menu item.

C. Add the XYZ display menu item to the Entry Points of an extension of an existing Security Privilege in the Application Suite model.

D. Set the Create Permissions and Delete Permissions properties on the XYZ display menu item.

Answer: A

Explanation:

Explanation: Section: Manage the User Interface and Security for Developers (20-25%) Explanation/Reference: BPErrormenuItemNotCoveredByPrivilege: Only the system administrator role can access this form

NEW QUESTION: 2

Why should you never power on a computer that you need to acquire digital evidence from?

A. When the computer boots up, files are written to the computer rendering the data nclean

B. When the computer boots up, the system cache is cleared which could destroy evidence

C. When the computer boots up, data in the memory buffer is cleared which could destroy evidence

D. Powering on a computer has no affect when needing to acquire digital evidence from it

Answer: A

NEW QUESTION: 3

Your network contains a single Active Directory domain. The domain contains a System Center Configuration Manager 2007 R3 site and a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) site.

You need to ensure that you can migrate objects from Configuration Manager 2007 R3 to System Center 2012 R2 Configuration Manager SP1.

What should you do?

A. Extend the Active Directory schema and assign the Central Administration site server permissions to the System\System Management container.

B. Connect the System Center2012 R2 Configuration Manager SP1 primary site as a child primary site of the System Center Configuration Manager 2007 R3 primary site.

C. Assign the computer account of the Central Administration site server permission to the Configuration Manager 2007 R3 site. Assign the computer account of the Central Administration site server permission to the Microsoft SQL Server database instance.

D. Connect the System Center Configuration Manager 2007 R3 primary site as a child primary site of the System Center 2012 R2 Configuration Manager SP1 primary site.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

To migrate from a supported source hierarchy, you must have access to each applicable Configuration Manager source site, and permissions within the System Center 2012 Configuration Manager destination site to configure and run migration operations.

Answer:

Explanation:

Explanation

Box 1: Zone-redundant storage (ZRS)
Zone-redundant storage (ZRS) replicates your data synchronously across three storage clusters in a single region.
LRS would not remain available if a data center in the region fails
GRS and RA GRS use asynchronous replication.
Box 2: StorageV2 (general purpose V2)
ZRS only support GPv2.
