Explanation:

Application Permission: Read directory data

directly.
Delegated Permission: Read and write Directory Data
The application must be able to write data to the tenant on
behalf of a user.
As an administrator, you can also consent to an application's
delegated permissions on behalf of all the users in your
tenant. This will prevent the consent dialog from appearing for
every user in the tenant.

You can do this from the Azure portal from your application page. From the Settings blade for your application, click Required Permissions and click on the Grant Permissions button.
